SECTIONAL GARAGE DOORS

RÄUM SECTIONAL GARAGE DOOR SYSTEMS

RÄUM : The Leading Choice for Garage Doors

We know that the appearance of your garage door is important, so we put just as much effort into the styling and finish of your garage door as we do in to the security and durability features.

Create a truly unique door

Every RÄUM Garage Door is tailor made to your exacting requirements. With our unrivalled range of 15 exclusive, stylish and modern painted and laminated colour finishes, there is something in our range for every home. There is also a choice of extras including glazing options and pedestrian doors. You can create a garage door that can form a significant part of a visitor's first impression of your home, which is why we put as much effort into the appearance of your garage door as we do with meeting your expectations for safety, security and durability.

Our sectional doors are available in Smooth Flush and Smooth Large Ribbed, as well as our stunning pearlescent Microline finishes and Traditional Georgian Panel designs.

Premium quality Garage Doors backed up by our 10 Year Guarantee

All garage doors are manufactured in accordance with the ISO 9001 quality management system and comply with the stringent safety requirements of European garage door standard EN 13241-1.

SmartGarage App

Use your smartphone instead of a hand transmitter

With one "swipe" across the touch screen you can open and close the garage door, control the lighting, ventilation function and you can read out the operator parameters.

- ✓ Door control and reading of the door with smartphone and tablet
- ✓ Control of lighting and ventilation function
- ✓ Control more than one garage door with the APP
- ✓ Make your garage as background image
- ✓ Industry leading 5 year guarantee

The new SmartGarage app* is available from the APP Store or Google Play and is suitable for Apple and Android Systems.

* only suitable for use with the Gateway System which is available as an extra component.

It is unlawful to use the APP on your device when driving your vehicle.

SmartGarage App backed up by our 5 Year Guarantee

All garage doors operators are manufactured in accordance with the ISO 9001 quality management system and comply with the stringent safety requirements of European garage door standard EN 13241-1.

RÄUM SECTIONAL GARAGE DOOR SYSTEMS

Insulated Sectional Doors

Highly Insulating Durable 45mm Double Skin

Comprised of individual sections connected together by hinges. The door opens vertically into the garage and with no 'kick out' as it moves, providing you with up to three feet of increased drive length against Up & Over Garage Doors.

Sectional doors are also very attractive in design – high quality materials, incorporating the latest innovations in manufacturing technology together with a wide choice of options give your garage an individual look. Add the built-in insulation, which provides both a thermal and acoustic barrier, helping to control your energy bills, reduce noise and possibly your carbon footprint.

Exclusive RÄUM Colour Range

15 exclusive and stylish durable painted or laminated finishes, something to match every home.

Frost Proof Seals

A rubber profile on the bottom edge evens out slight unevenness of the floor and guarantees optimum protection from water, dust and dirt. The floor seal is made of high-quality EPDM, which is known for its high elasticity, weather resistance and durability. All of the seals are designed to withstand the elements.

RÄUM 10 Year Corrosion Guarantee

All of our Sectional Garage Doors are fitted with a weatherproof frame base made of hot-dip galvanized steel protecting the most vulnerable area of any steel constructed door. Water and accumulated moisture is able to drain off freely and the frame will not rust, even after long periods of rainfall. The highly durable flexible floor seal also protects the bottom of the door from damage, often the cause of corrosion.

45mm

Triple safety extension

RÄUM garage doors up to 3000mm wide are fitted with robust triple safety extension spring assemblies and double steel cables. The garage door cannot fall even in case of a fracture to one of the springs.

Automatic Cut-Out

The automatic cut-out device stops and opens the garage door as soon as it comes up against an obstacle. The electronically monitored push-up safeguard provides maximum burglar resistance.

Interference protector

Angular frames make it almost impossible for interference between the door leaf and the frame. Carrying cables arranged inside minimise the risk of injury and guarantee maximum operational reliability.

Unique track mounted motor avoids height issues with rafters

RÄUM Garage Door Automation Maximum Convenience - Maximum Security

Never again will you have to go out in the rain to check that your garage door is closed! With a single push of a button on the key fob remote control and now with 'SmartGarage' you can operate your door from your Smart Phone.

The control system has in-built automatic signal encryption to ensure the utmost protection against manipulation and your security. There is also a wall mounted keypad for opening the garage from the inside.

Garage Doors equipped with our automatic operators have an automatic safety cut-out that secures the closing edge immediately and stops the door moving if there is an obstruction.

The operator has easy accessible connections for wired accessories, such as external security lighting or signal lamps that can be remote controlled or operated by keypad. In addition, 2 remote controls are included as standard, however, with the addition of a "Gateway Control" module you can now also be connected via use of the 'SmartGarage' Smart Phone App.

The operators also come with an industry leading 5 Year Guarantee.

Unique motor is not fixed to the ceiling like conventional operators It's simply integrated into the side garage door track!

The operator can be mounted in the right garage track, the control on the right garage wall

The operator can also be placed directly next to the garage door in the area of the side rebate

An optional cable extension can be used in case of a fitted side rebate, e.g., through a side door.

MORE SPACE

More space in front of the Garage

Unlike an up-and-over door, a sectional door opens vertically upwards and doesn't swing out, which means you can optimally use every inch of space in front of the garage – to park a second car, for example.

A garage door suitable for every vehicle

Utilise the full height of your garage with an electronically operated garage door.

Fitting a sectional garage door allows you to benefit from the full width of your garage, as it is mounted behind the opening.

The garage door moves upwards as it opens and fits conveniently just beneath the ceiling. This allows more usable height for high vehicles such as 4x4s or vans.

For every opening

A RÄUM sectional garage door will always fit:

in a classic square shaped garage

behind an opening with slanted corners

unobtrusively erected segment arches

or elegantly integrated arches

Sectional door benefits

- ✓ Good sound-insulation
- ✓ Thermal insulation value @ $k=0.5 \text{ W/m}^2\text{K}$, keeping the heat in and cold out.
- ✓ High performance weather protected
- ✓ Quiet when in motion
- ✓ Multi-use garage more than just storage
- ✓ You don't need a door frame
- ✓ Superb if you have a wide car
- ✓ Full access to the roof space
- ✓ RÄUM 10 year guarantee

RÄUM MICROLINE GARAGE DOOR

Perfectly designed: Microline Garage Door

The RÄUM Microline sectional garage door has a modern, profiled wave structure with a striking and expressive light and shade effect. High quality materials, incorporating the latest innovations in manufacturing technology give your garage an individual look. Add the built-in insulation, which provides both a thermal and acoustic barrier, helping to control your energy bills, reduce noise and possibly your carbon footprint.

Microline Flush Satin Grey

Tested security

All of our garage doors guarantee the highest levels of safety and security. All doors are fully CE marked and in addition to their functional reliability and the protection they offer friends and family with their anti-pinch protection (inside and out) and torsion spring with spring fracture safety device on both sides, their elaborate design is also able to withstand intrusion attempts.

SmartGarage App

Use your smartphone instead of a hand transmitter

With one "swipe" across the touch screen you can open and close the garage door, control the lighting, ventilation function and you can read out the operator parameters.

RÄUM GEORGAIN PANEL GARAGE DOOR

Georgian doors with various glass designs

The RÄUM Georgian sectional garage door is comprised of individual sections connected together by hinges. The door opens vertically into the garage and with no 'kick out' as it moves, providing you with up to three feet of increased drive length against Up & Over Garage Doors.

Georgian Panelled

Georgian Panelled Glazed

- ✓ Vertical operation means you can park right up to the door
- ✓ Automatic safety features will stop and reverse the door operation, when it senses an obstruction
- ✓ Remote operation from the comfort of your car
- ✓ Frame and door weather seals help keep the rain and wind out
- ✓ Thermal insulation value @ $k=0.5 \text{ W/m}^2\text{K}$, keeping the heat in and cold out

Glazing options

Our attractive glazing options not only make a feature of your garage, but also let the light in as well, which is especially appealing if you use your garage as a storage room or workshop. All RÄUM glazing panels are manufactured out of weather-resistant acrylic glass or impact-resistant polycarbonate and stand out due to their high transparency. Furthermore, being double glazed panes, they have excellent heat insulating properties!

RÄUM SIDE AND PASS GARAGE DOORS

Intelligent Design: RÄUM Garage Side Door

Don't want to always have to open and close the garage door for your bike, lawn mower or screwdriver?

Then RÄUM has the practical solution for you: we offer matching side doors for all garage doors – for quick and easy access that also looks good. Side doors for RÄUM garage doors are available in all standard garage door patterns and colours, in all standard sizes – in short, exactly how you want it. Customized sizes are also possible.

Perfectly Integrated: RÄUM Garage Pass Door

If your garage is too narrow for a side door, but you don't want to have to do without that convenience, then we recommend an integrated pass door. Pass doors are available for all RÄUM garage doors up to a width of 5 m.

RÄUM garage pass doors offer a practical passage width and are fitted with double-skinned insulation to ensure perfect thermal performance.

Roller Shutter Garage Door

An ideal solution for those who want to improve the appearance and gain space in their garage

1. Manual Override

A connector and crank handle are supplied as standard, so your door can be opened, from inside, even during a power cut.

2. RÄUM Shield

Shields the user from accidental finger entrapment and provides an attractive finish to the door curtain.

3. Control System

An interior light is provided within the self contained control box.

4. Guide Rails.

Guide rails made from aluminium profile with a white polyester powder coated finish.

5. Safety Edge

Supplied as standard. At the bottom edge of your door is an emergency sensor which will stop and reverse when the door is in operation, if it senses an obstruction.

Premium quality backed up by our 10 Year Guarantee

All garage doors and operators are manufactured in accordance with the ISO 9001 quality management system and comply with the stringent safety requirements of European garage door standard EN 13241-1.
